

vision_utils

`vision_utils` is a [ROS](#) package that supplies a variety of tools and utilities to manipulate color images, depth images, user masks, and more.

How to install

1. Dependencies included in the Ubuntu packages

Please run the [rosdep](#) utility:

```
1 $ sudo apt-get install python-rosdep
2 $ sudo rosdep init
3 $ rosdep install vision_utils
```

2. Dependencies from sources

Dependencies handling is based on the [wstool](#) tool. Run the following instructions:

```
1 $ sudo apt-get install python-wstool
2 $ wstool init
3 $ wstool merge `rospack find vision_utils`/dependencies.rosinstall
4 $ roscd ; cd src
5 $ wstool update
```
